

Epilepsy Care

New surgical options for seizures

Epilepsy education class

There are many treatment options for people living with epilepsy. For patients who have seizures that are not controlled by medication, epilepsy surgery may be a safe and effective option. Join us for a free class to learn about your surgical treatment options, including innovative new procedures that may help improve your quality of life.

We'll cover:

- Types of surgical options
- Benefits and risks of each surgery
- How to get started with the patient evaluation process
- Your questions

Class is led by Jim White, MD from Minnesota Epilepsy Group and Abbott Northwestern's Neuroscience Institute.

When: Thursday, October 18, 2018
6:30-7:30 p.m.

Where: Abbott Northwestern – WestHealth
Plymouth Conference Room
2805 Campus Drive
Plymouth, MN 55441

Cost: FREE
